Economic Competitiveness

1. Target market
   • Who sets the goal?
   • Who are the competitors? Renewables as a threat?
   • How to calculate?
   • What are the specific SMR advantages except price?

2. Reduce cost
   • Design simplification
   • New technical solutions and safety
   • Shorter construction period
   • Economy of scale when thinking of SMR fleet
   • Investment and banking
Supply Chain

3. Supply chain
   • monopolized market: fuel, graphite
   • long lifecycle of nuclear projects: how to support a supplier?
   • global cooperation: information exchange, vendors international alliances
   • standardization

4. Localization
   • mature technology easier to localize
   • non-safety-related equipment
   • win-win scheme

5. Different economic models for newcomers and experienced vendors: nuclear infrastructure
