

R2D2P Technical Meeting and Workshop
3-7 December 2007, Manila

PRACTICAL EXERCISE

Prepare a characterization survey plan for selected areas of the PRR-1, giving survey requirements, methods chosen, personnel and equipment required, and a work schedule.

The participants will be divided into three groups, with each group being assigned one of the following areas:

- A. The Reactor Pool and Reactor Bay.
- B. The Reactor Building East Wing.
- C. The Reactor Grounds.

The document "*Chapter 1, Reactor Description*" shall be used as a reference.

The characterization survey plan should produce data that will be usable in planning the dismantling and decontamination of the selected area. The IAEA Safety Standards should be assumed to apply.
