Agenda

- Where are we now?
- What's new in SharePoint 2013?
- How to ...
 - Protect content
 - Publish databases
 - Upload multiple files
- Questions and answers

Where are we now?

- SharePoint 2013 is now the standard
- Existing sites migrated to SharePoint 2013 in “compatibility mode”

What's new in SharePoint 2013?

- “Responsive” design
- Full feature set
 - Some advanced features require Office 2013
- More social
 - Better tagging
 - “Following” content

How to protect content?

- Access controls can be applied at various levels
- Think about the overhead of managing access

How to publish databases?

- Think of
 - Accessing all items at once vs. one page at a time
 - Alternative views
 - Searching and filtering
 - Collaborative editing
 - Version control
 - Performance

How to upload multiple files?

- Drag and drop (SharePoint 2013)
- Upload using Windows Explorer (2013)
- Open with Explorer
