

## The VMS influenza immunisation campaign 2022

In the last two years during the coronavirus (Covid-19) pandemic, increased influenza vaccination combined with the use of masks, reduced social gatherings and travel, resulted in a low level of influenza cases globally.

Now social interactions are increasing once again and with them the potential risk of influenza particularly during the winter season.

The flu vaccination campaign, starting on 3 October, provides staff, particularly those at high risk, such as frequent travellers, with the opportunity to protect themselves against influenza.

The VIC 2022 Influenza Vaccination Campaign will run from 3 to 25 October.

During this period the influenza vaccine will be available free of charge for VIC staff, consultants and interns. Officially recognised dependants can also be vaccinated for a fee of a €12 (e.g. spouse, and children: 18-21 years of old only).

You can book your slot online [here](#).

On the 27 October, from 11 am to 2 pm flu vaccination will be available without appointment at the Rotunda.

VIC Medical Service will not vaccinate you if you:

- have experienced an adverse reaction to previous flu injections,
- have a fever (38° C or above) or a heavy cold,
- are pregnant.

When visiting Medical Service for your scheduled vaccination please bring:

- the appointment confirmation (printed or digitally);
- a signed copy of the consent form (available [here](#));
- your yellow vaccination booklet, if available;
- proof of payment for each officially recognised dependant (payment details below).

### ***Payment details:***

Payable to IAEA, Wien- BACA-AG No. 00237571500

BLZ (Bankleitzahl): 12000

IBAN: AT41 1100 0002 3757 1500
