

The 2019 ISOE International Symposium on Occupational Exposure Management at Nuclear Facilities

The IAEA Technical Centre of the Information System on Occupational Exposure (ISOE), in collaboration with the Nuclear and Radiation Safety Centre, Ministry of Ecology and Environment of China is organizing the 2019 ISOE International Symposium on Occupational Exposure Management at Nuclear Facilities.

The Symposium will be held in Beijing, China, from 22th to 24th October 2019. The International Atomic Energy Agency (IAEA), the OECD Nuclear Energy Agency (NEA), the Chinese Society of Radiation Protection, the Radiation Monitoring Centre of China General Nuclear Corporation and the Beijing Society of Radiation Safety are co-sponsors of this Symposium.

The Symposium is an ideal opportunity for participants to take part in discussions, plenary sessions and presentations of posters.

The main objectives of the Symposium are:

- to provide a wide platform for information exchange on occupational exposure concerns in nuclear power plants (practices, management and procedures, dose results and reduction, improvements of techniques and tools, etc.).
- to provide an opportunity to transfer the knowledge and experiences on occupational radiation protection accumulated in the ISOE system to newcomers and countries embarking on Nuclear Power.
- to allow vendors to present their recent experience and developments in radiation protection (measurement techniques, operating and plant design improvements, ALARA practices during operation and outages, etc.) in a commercial exhibition.

All abstracts should be sent to the contact-person by E-mail (ISOE2019@iaea.org) by the 30th June 2019.

More detailed information can be found on the ISOE web: http://www.isoe-network.net/images/stories/call4paper/Call_Beijing2019.pdf
