

STAKEHOLDER ENGAGEMENT IN DEVELOPING TRAWSFYNYDD SITE

Nia Bowden, Gwynedd Council

LOCATION AND GOVERNANCE

Gwynedd

Trawsfynydd

Meirionnydd

Snowdonia
National Park

TRAWSFYNYDD POWER STATION

- 2 x 235MW Magnox reactors
- UK's only inland power station, on the shore of a 12 acre man-made lake

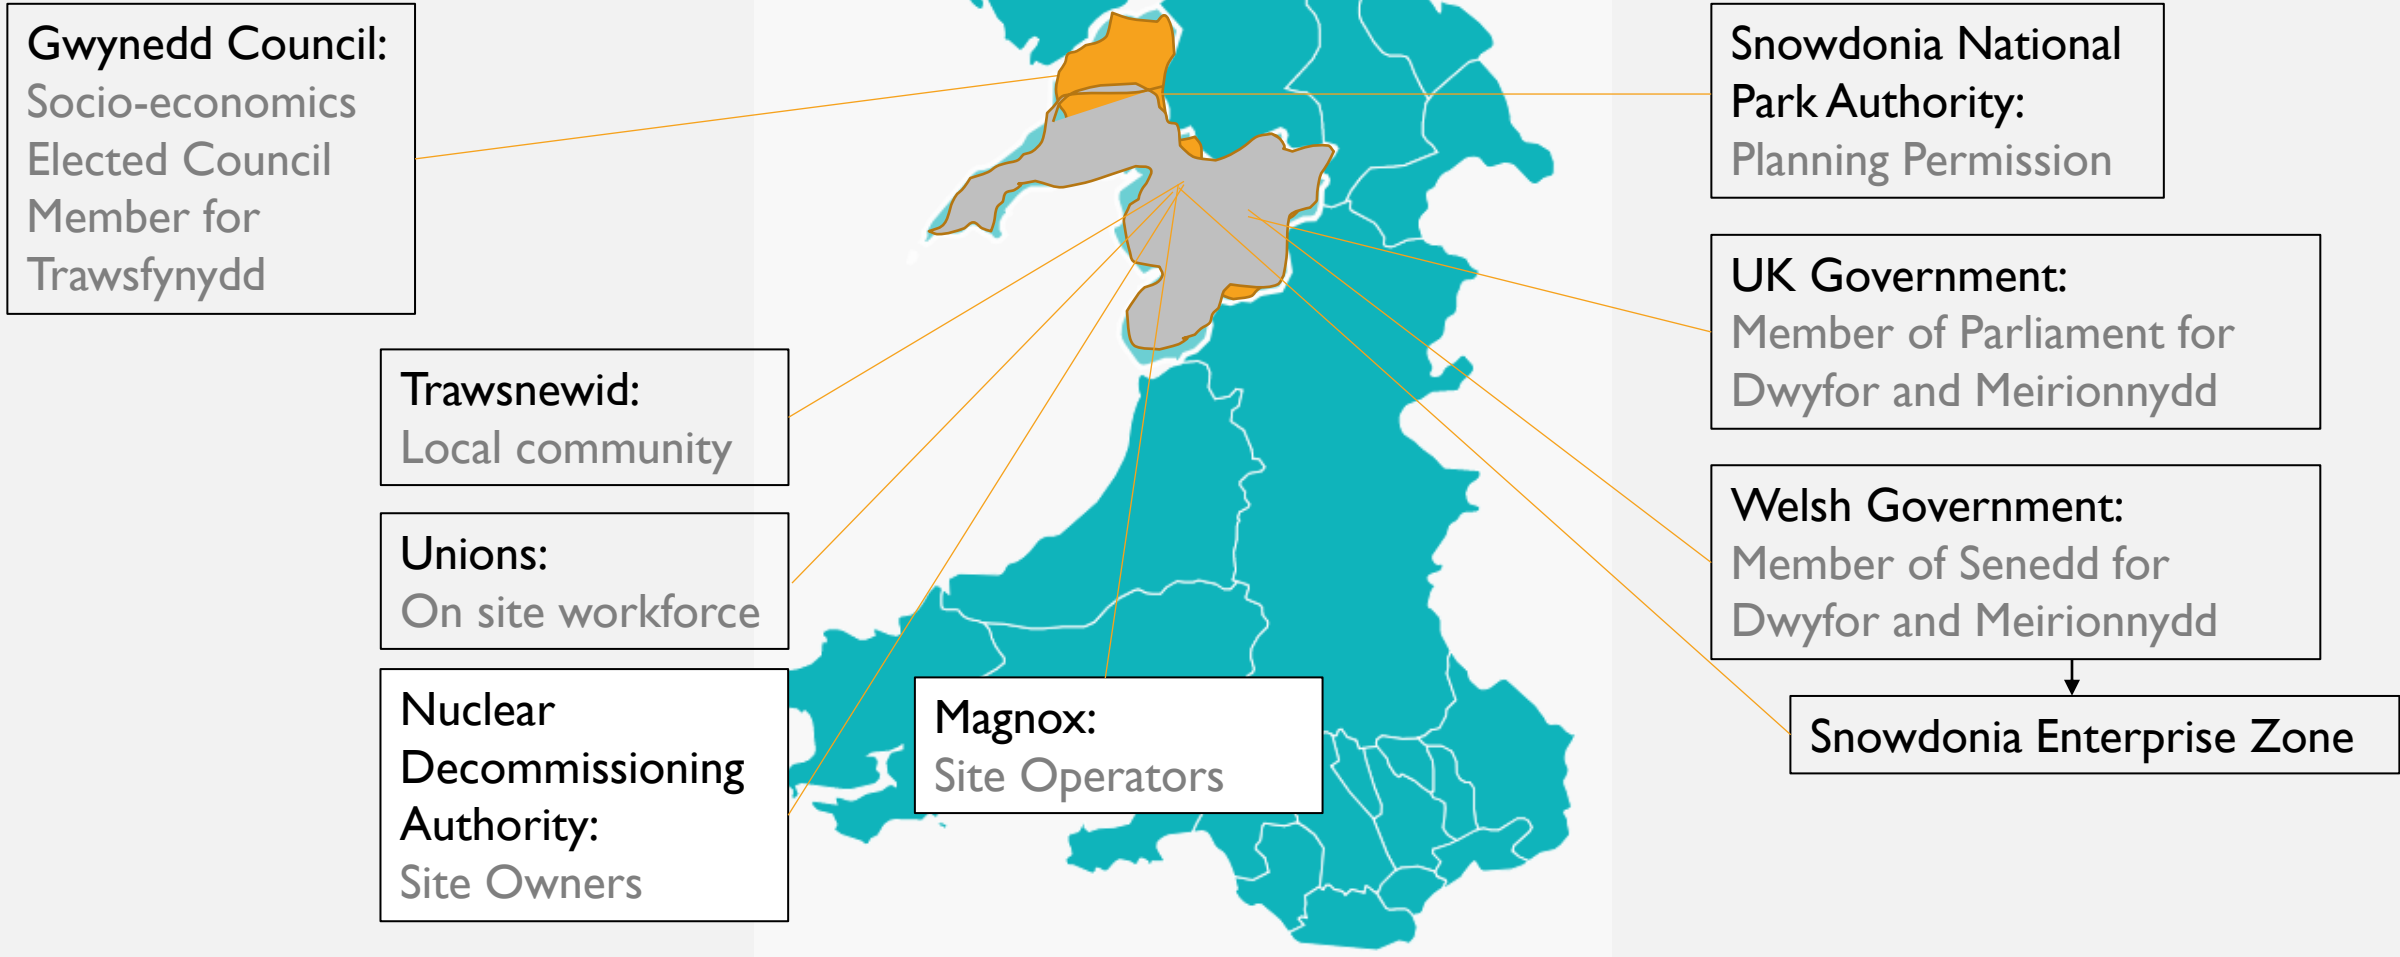

- Originally due to enter “Care and Maintenance” in 2016 (then 2030) – left for 50 years before fully decommissioning.

SOCIO-ECONOMICS

- Very rural area
- Very fragile economy
- Lowest full time weekly pay in the UK
- 95% of businesses employ fewer than 10
- Stronghold of the Welsh language – over half the population live their lives through Welsh – danger of losing this without good jobs
- Well paid Magnox jobs are very valuable, but will decline as the station is decommissioned
- **2 aims for stakeholders:**
 - **Keep jobs on site as long as possible**
 - **Attract new high quality employment to site in the long term**

STAKEHOLDERS

STAKEHOLDER ENGAGEMENT

Welsh
Government

- Cross-departmental expertise provided
- Finance available to implement work packages

Snowdonia Enterprise
Zone Board

- Selected stakeholders represented, and industry experts
- Work packages identified

Trawsfynydd Oversight Board

- All stakeholders represented
- Twice-yearly meetings
- Open discussion and idea generation

OUTCOMES AND ACHIEVEMENTS

- Keeping jobs on site as long as possible:
 - Continuous Decommissioning – site chosen as first to test new model of decommissioning
- Attracting new high quality jobs to site:
 - Major studies to identify best use of the land for job creation
 - Significant marketing and lobbying work to raise the site's profile, especially with regards to low carbon developments including SMR/AMR
 - Creation of dedicated development company – Cwmni Eginno.
